

Report on CSR (Corporate Social Responsibility) for the
Financial Year 2023-24

Background: DVC has always been driven by socially responsible values. In 1981, the Corporate Social Responsibility (the then Social Integration Programme-SIP) programme was launched and today it covers 629 villages within 10 km radius of respective projects in West Bengal and Jharkhand. Corporate Social Responsibility has touched and transformed lives and empowered the people living in the Damodar Valley. Damodar Valley Corporation has been doing CSR activities in the villages situated within 10 km radius of its major plants since 1981-82 on a continuous basis to ensure socio-economic upliftment of the downtrodden and marginalized section of the society, specially the tribals and economically backward people. DVC's developmental initiative for its neighbour is one of the oldest CSR blueprints in India. The CSR programme has originated from an enabling provision in the DVC Act (1948) which urge towards "Promotion of public health and agriculture, industrial, economic and general well-being in the valley and the area of operation of the Corporation. DVC is committed to the goal of sustainable development and conservation of natural resources. Accordingly, DVC, since its inception is contributing to sustainable development by delivering economic, social and environmental benefit to all stakeholders.

Policy on CSR: DVC came out with its new CSR policy in 2022 and in pursuance to bring about a positive change, priority is accorded for undertaking activities for socio-economic development of the society living in the periphery of DVC's major plants. Adhering to the Department of Public Enterprise (DPE) guideline and United Nation's Millennium Development Goals, the following thrust areas have been rounded up as the CSR activities of DVC.

Salient features:

- The Corporate Social Responsibility aims at facilitating all round growth of DVC by enhancing the quality of lives of communities residing therein.
- Uplifting the socio-economic conditions of the communities residing around major projects of DVC.
- Supplementing but not substituting the socio-economic development programmes of the Government of India and respective State Governments for development in villages in CSR defined areas.
- Ensuring people's participation inter alia organizing and motivating communities into forming women Self-help Groups (SHG) through the process of social mobilization, training and capacity building at every stage of the programme from planning to implementation.
- DVC shall strive to improve the standard of living of the PAPs and community living in the target village through integrated development approach under its CSR and shall maintain a cordial relation with the local authorities and communities through transparency and continued development activities.
- DVC shall aim at minimizing social risk associated with the projects through the CSR programme.

Project wise list of CSR works carried out during FY 2023-24 are given below:

Project: Durgapur Thermal Power Station	
Sl. No.	Name of Work
