

DAMODAR VALLEY CORPORATION  
VIGILANCE DEPARTMENT  
KOLKATA - 700054

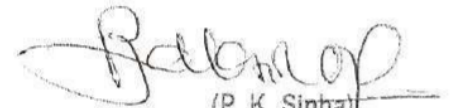

No. Vig./Misc.(WB)/11/288

Date 25.10.2011

OFFICE MEMORANDUM

Of late, a lot of complaints have been received regarding theft/ huge shortage of coal at different TPSs of DVC. While delving into the complaints, it has come to light that in most of the TPSs, although there are established Weigh Bridges for measurement of the amount of coal coming through rakes, those are not utilised for measurement and reconciliation of coal. This has led to eventual complication in tallying the quantity of coal received and consumed.

It is, therefore, advised that the In-motion Weigh Bridges at the TPPs shall be put to good use for measuring the coal supplied through rakes by way of registering the weights of both loaded rakes during entry to the plant area and the same of empty ones after unloading of the wagons. In the plants, where the Weigh Bridges are lying non-functional, immediate action shall be taken for utilization of the facility for coal measurement purpose.

  
(P. K. Sinha)  
Chief Vigilance Officer
