**Reverse e-Auction:** Reverse e-Auction is used to procure items/services, where the requirement for one/more Markets of an item is stated and the participants are required to bid down the price to be selected to supply the requirement.

**On-line Reverse e-Auctions:** On-line Reverse e-Auctions refer to those Reverse e-Auctions conducted through the Internet with simultaneous bidding by the bidders (from one or more locations). In other words, the venue for the auction is on an Internet website/ platform. website URL (<https://etenders.gov.in/eprocure/app>) would constitute the venue for the purpose of the on-line auction.

**Award at the Reverse e-Auction:** The bidder quoting the lowest price is normally allotted the item unless otherwise specified by the Client. Price obtained at any stage in the event is valid and legally binding on the bidder.

**Client:** Client is DVC who has conducted such Reverse e-Auction. In case of Reverse e-Auction, the purpose would be to meet their requirement for item/s from among the sellers desiring to sell the items to the Client.

**Bidder / Tenderer:** Bidder is the individual/business entity participating in the Reverse e-Auction, intending to supply the item/s to the Client. To be become a Bidder in the auction, a business entity has to secure client approval for participation and also provide written assent to the General Rules and Regulations.

**Elapse Time in Minutes:** It is the minute(s) before the auction end time and acts as a trigger for auto extension of auction. If a bid is received successfully within this minutes, the auction will be extended.

**Start Time:** Start time refers to the time of commencement of the conduct of the On-line auction. It signals the commencement of the Price Discovery process through competitive bidding.

**Duration of the Reverse e-Auction:** It refers to the length of time the price discovery process is allowed to continue by accepting bids from competing bidders. The duration of the auction would normally be for a pre-specified period of time. However, the bidding rules may state the conditions when the pre-specified duration may be extended/ curtailed.

**Auto Extension Times:** In the event of bids in the last few minutes of the Elapse time, the Bid Timings are automatically extended for a specified period from each such bid. Such Auto Extension shall continue until no bids are received in elapsed time The Inactivity Time for Auto Extension purpose is normally 5 minutes. DVC however, retain the right to change the same. The Inactivity Time applicable for the particular On-line Bid shall be communicated to the bidder if it will be set to a value less than 5 minutes.

Prices above the start bid price will be rejected by the system. The bidders will have to bid equal to or below the start bid price."

**Decrement value:** Minimum decrement is the minimum amount a supplier has to reduce in order to beat a higher bid. For example, if a bidder bids Rs. 10,00,000/- for a Market, others, in order to beat this bid, have to quote a lower price with a minimum decrement say of Rs. 20,000/- i.e. in order to be eligible they have to quote Rs. 9,80,000/- (or lower) for the same Market. This minimum decrement shall be pre-decided by DVC and will be in-built in the auction engine.

**Max Seal Percentage:** It defines maximum value a bidder can quote in multiples of incremental/ decrement value.

**In case of Reverse Auction,** in order to displace a standing lowest bid and to become "L1", a bidder can offer a minimum bid decrement or in multiples of decrement value up to above Max Seal %. For ex: Current price: - Rs. 49,000 Decrement value: - Rs. 1000 System Defined Maximum Seal %: - 50, in this case a bidder can quote minimum decrement amount as Rs. 49,000-1000= Rs. 48,000 and maximum decrement amount is 49000-24500-1000=23500=24000\*.
